

Golden Billion Lotto (GBL)

Official Whitepaper - Version 1.0

Building the Future of AI & Blockchain on Solana

Executive Summary

Golden Billion Lotto (GBL) is a long-term, community-driven blockchain project built on the Solana network. Our vision is to create an ecosystem where blockchain technology and Artificial Intelligence work together to deliver meaningful value, encourage innovation, and support a global community.

Our Story

GBL was created with the belief that blockchain technology should build lasting value through innovation, transparency, and community participation. Our goal is to develop a sustainable ecosystem that evolves over time and explores practical AI-powered utilities for its community.

Mission

To build a trusted long-term blockchain ecosystem powered by innovation, transparency, and continuous development.

Vision

To become a respected community project on Solana by combining blockchain and AI into useful products and services.

Core Values

Transparency • Community • Innovation • Long-Term Thinking • Continuous Improvement
